

Meet the ingredients for your next bestseller – in just four hours

Right now, there is rapid development happening in the field of plant ingredients in Denmark. A development that opens up entirely new possibilities within areas such as proteins, upcycling, flavoring agents, shelf life, fermentation, and plant-enriched meat products.

If you get started too late, or waste time on the wrong partnerships, it could mean lost competitive advantages.

PI EXPO has been created to give the food industry a shortcut to innovative ingredient suppliers who can contribute to quality, the bottom line, and a lower CO2 footprint.

All exhibitors at PI EXPO are handpicked, ensuring you have access to high-quality products from ingredient suppliers who can deliver on the food industry's terms.

PI EXPO is particularly relevant to you if you work with product development or procurement in the food industry, large-scale kitchens, or canteens.

Admission to PI EXPO is free.
